Shown with Next Gen Smartwheel® and Kenworth's exclusive Diamond VIT interior with a black dash, wood grain trim, and Madrona accent color on door pad, seats, and sleeper. Kenworth's innovative Smartwheel has been updated for digital display feature control – placing all important vehicle performance information readily at hand with tactile, eyes-on-the-road functionality.

DIGITAL DISPLAY

Maximized View

The 15-inch high-definition digital display contains everything a driver needs to monitor critical vehicle performance - This is an expanded view of the standard gauge layout straight from the factory. A Favorites View allows you to configure the screen for as much or as little content as desired.

Minimized View

In Minimized View, all gauges are removed except for speedometer and tachometer providing the ultimate "Dark Cockpit" experience and minimum distraction. Warnings and faults present themselves if any issues arise. The hood and horizon headway display can be toggled off for a further darkened view.

Advanced Driver Assistance Systems Incorporation

Automated Driver Assistance Systems (ADAS) such as Adaptive Cruise Control (ACC), Collision Mitigation, and Lane Departure are also incorporated. Following distance can be adjusted and alerts are displayed with a combination of sound and clear visuals.

PTO Mode

If the truck is equipped with a Power Take Off (PTO), the Tachometer changes when the PTO is active to display a green PTO icon, RPMs and pre-set conditions if the truck is configured for those.

Body Builder Tell-tales

Telltale can be customized to match functions and/or added and edited to be displayed on the display. Examples include: Dump Box, Tarp Control, Tail Gate, Power On/Off, Vacuum On, Outrigger Down, Boom Stored, Conveyor Active, and many others.
